

Upper body

1 point per rep

Shoulder presses

How to do it

- 1 Stand tall with a weight in each hand at shoulder height, palms facing forward.
- 2 Press both weights straight up until your arms are nearly straight.
- 3 Lower slowly back to shoulder height.

Keep in mind: Keep your ribs down and your back from arching. If it arches, the weight is too heavy.

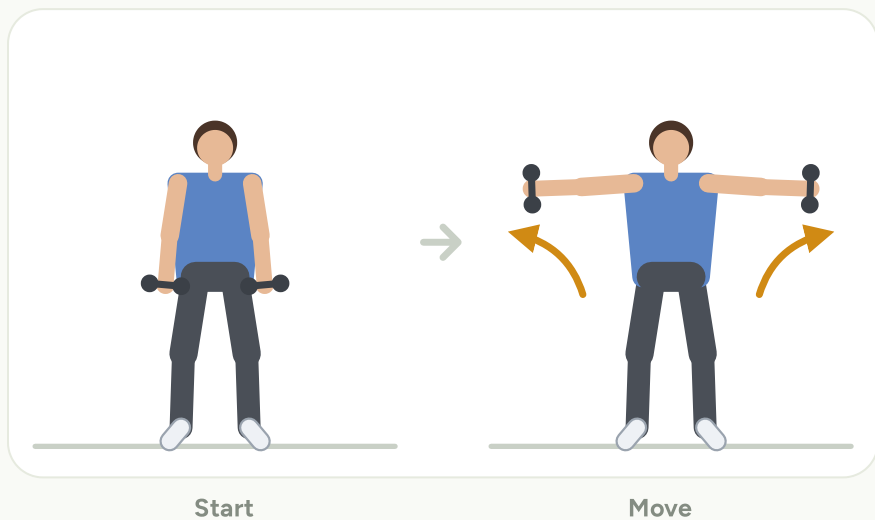

Start with
10–12 reps

Works your
shoulders + triceps

Upper body

2 points per rep

Side arm raises

How to do it

- 1 Stand tall with a weight in each hand by your sides.
- 2 With a slight bend in your elbows, lift both arms out to the side to shoulder height.
- 3 Pause, then lower slowly.

Keep in mind: Lead with your elbows and stop at shoulder height. Light weights done slowly work best.

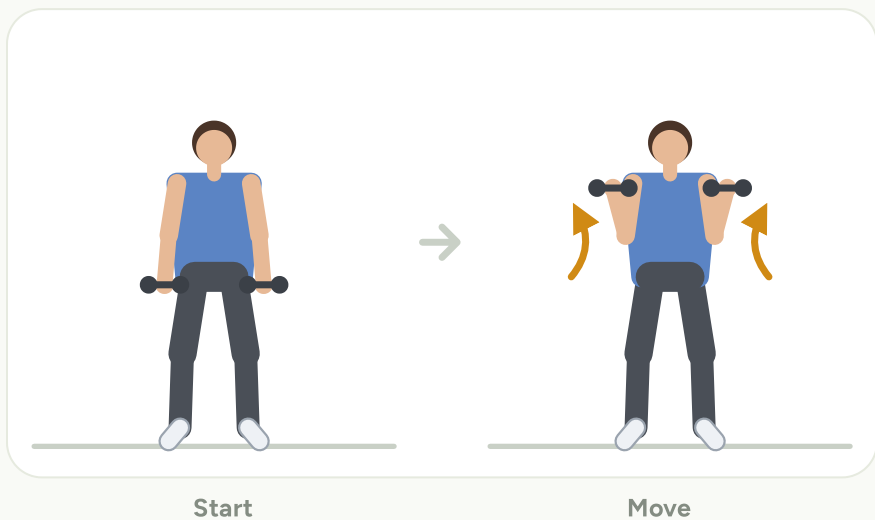

Start with
8–10 reps

Works your
shoulders

Upper body

1 point per rep

Bicep curls

How to do it

- 1 Stand tall, a weight in each hand, palms facing forward.
- 2 Keeping your elbows tucked into your sides, curl the weights up to your shoulders.
- 3 Lower slowly all the way down.

Keep in mind: Only your forearms should move. If your body swings, slow down or go lighter.

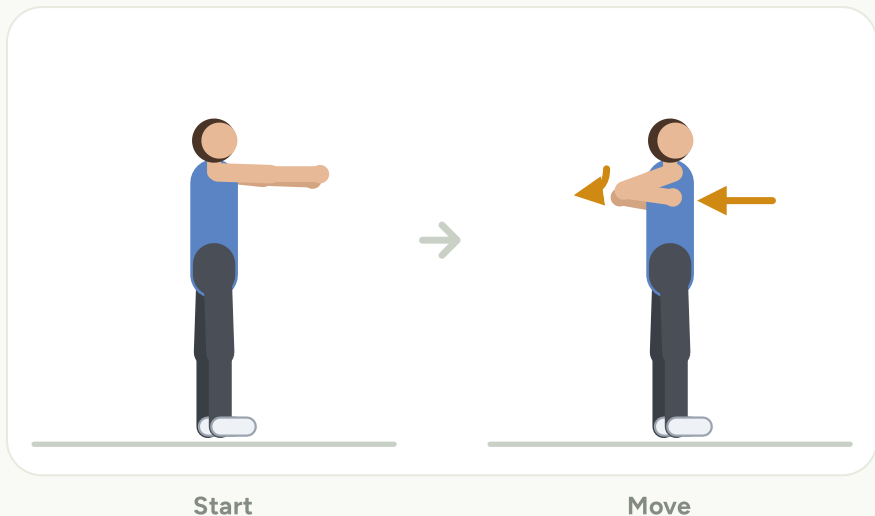

Start with
10–12 reps

Works your
biceps

Upper body

1 point per rep

Rhomboid pulls

How to do it

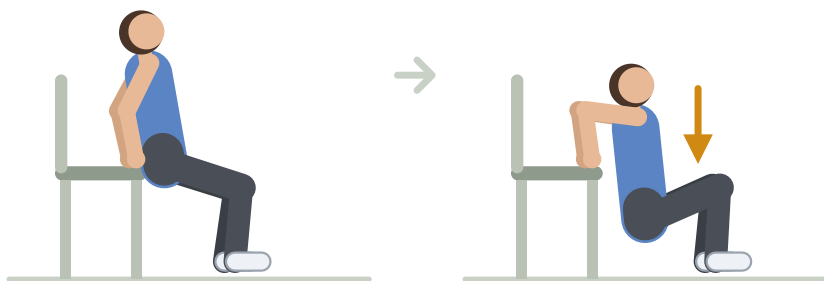

- 1 Stand tall with both arms straight out in front at chest height.
- 2 Pull your elbows straight back, squeezing your shoulder blades together.
- 3 Hold the squeeze for a second, then reach forward again.

Keep in mind: Keep your shoulders down, away from your ears. Use a resistance band or light weights to make it harder.

Start with
12–15 reps

Works your
upper back + posture

Tricep dips

Start

Move

How to do it

- 1 Sit on the edge of a sturdy chair, hands gripping the seat beside your hips. Slide your hips forward off the seat.
- 2 Bend your elbows straight back and lower your hips towards the floor.
- 3 Press through your palms to straighten your arms.

Keep in mind: Keep your back close to the chair and your elbows pointing behind you, not out to the sides.

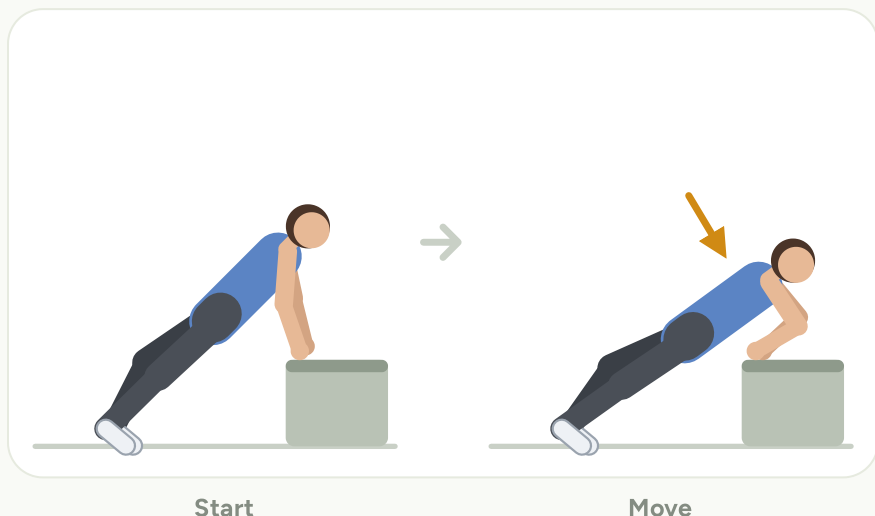

Start with
6–10 reps

Works your
triceps + shoulders

Upper body

2 points per rep

Incline push ups

How to do it

- 1 Place your hands on a sturdy raised surface (worktop, sofa arm or step), a little wider than your shoulders.
- 2 Walk your feet back until your body is one straight line.
- 3 Lower your chest to the edge, then push back up.

Keep in mind: Squeeze your stomach and glutes so your hips do not sag. A lower surface makes it harder.

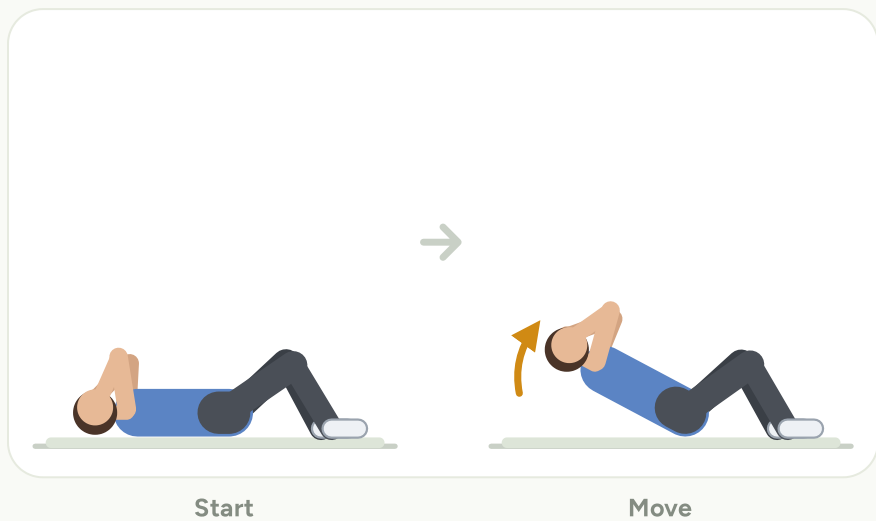

Start with
8–12 reps

Works your
chest + arms + core

Core

2 points per rep

Crunches

How to do it

- 1 Lie on your back with knees bent and feet flat. Rest your fingertips lightly behind your head.
- 2 Tighten your stomach and curl your shoulders a few inches off the floor.
- 3 Pause, then lower slowly.

Keep in mind: Lift with your stomach, not your neck. Keep a fist-sized gap between chin and chest.

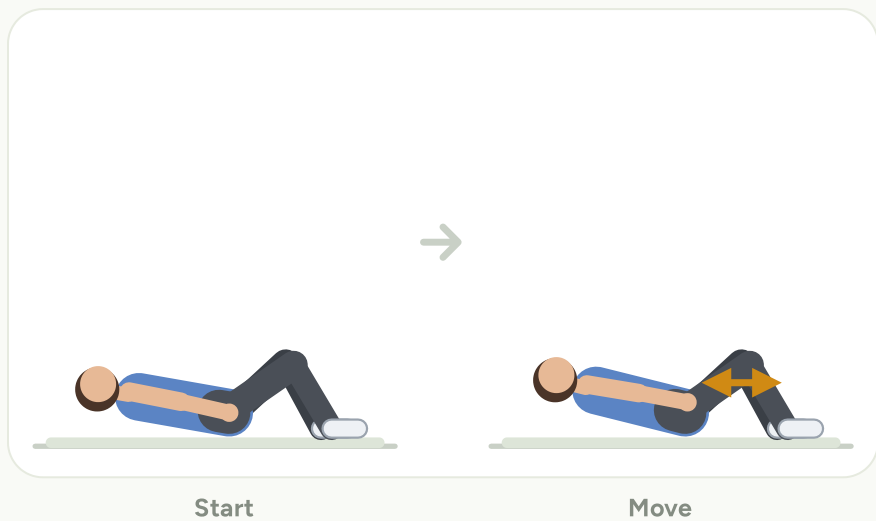

Start with
10–15 reps

Works your
abs

Core

1 point per rep

Heel touches

How to do it

- 1 Lie on your back, knees bent, feet flat and hip-width apart. Lift your shoulders slightly off the floor.
- 2 Reach your right hand down to touch your right heel.
- 3 Come back to the middle and reach to the left heel. Each touch is one rep.

Keep in mind: Keep your shoulders lifted the whole time and bend from the waist.

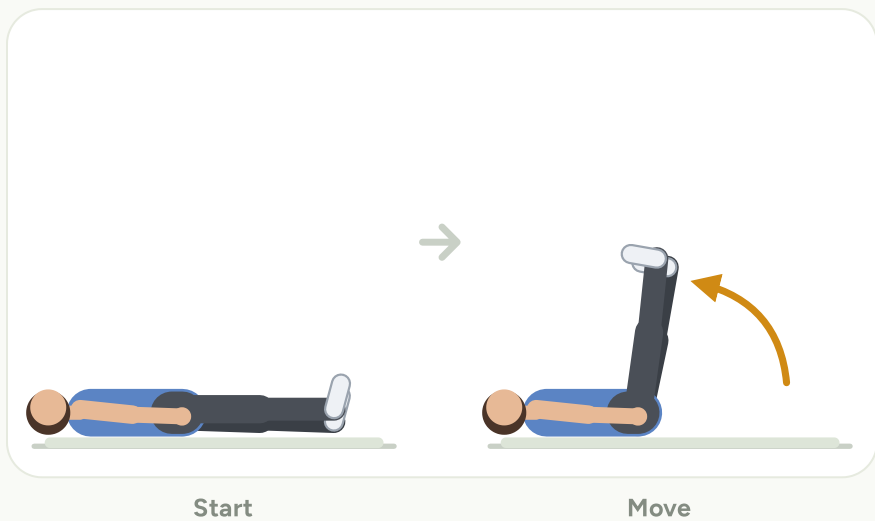

Start with
10 each side

Works your
obliques

Core

3 points per rep

Leg lifts

How to do it

- 1 Lie flat on your back with legs straight and hands by your sides or under your hips.
- 2 Keeping your legs together and as straight as you can, raise them until they point at the ceiling.
- 3 Lower them slowly, stopping just above the floor.

Keep in mind: Press your lower back into the floor. If it lifts, bend your knees a little or do not lower as far.

Start with
6–10 reps

Works your
lower abs

Core

2 points per rep

Hip lifts

How to do it

- 1 Lie on your back with your legs pointing straight up at the ceiling, hands by your sides.
- 2 Use your lower stomach to lift your hips a few inches off the floor, feet travelling straight up.
- 3 Lower your hips slowly back down.

Keep in mind: It is a small, controlled lift. Avoid swinging your legs to get momentum.

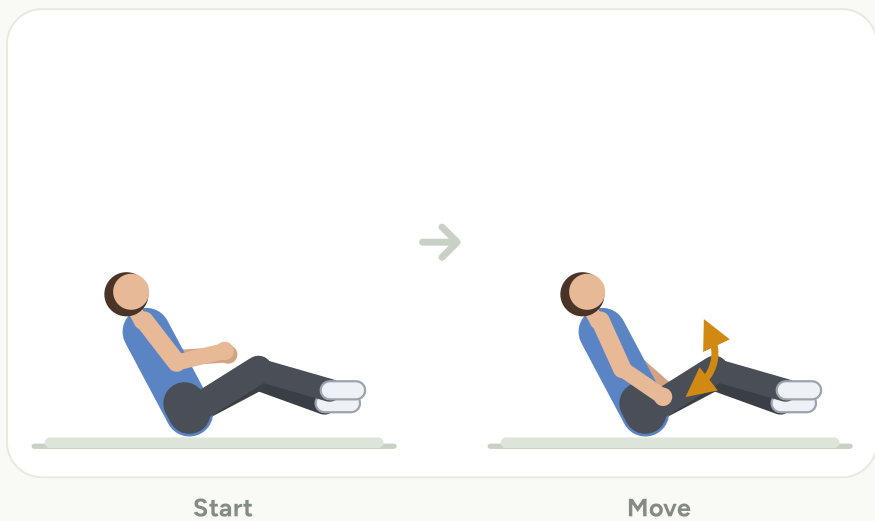

Start with
8–12 reps

Works your
lower abs

Core

2 points per rep

Russian twists

How to do it

- 1 Sit with knees bent, lean back slightly and lift your feet (or keep heels down to make it easier).
- 2 Clasp your hands and rotate your shoulders to tap the floor beside one hip.
- 3 Rotate to the other side. Each tap is one rep.

Keep in mind: Turn your whole ribcage, not just your arms. Keep your chest lifted.

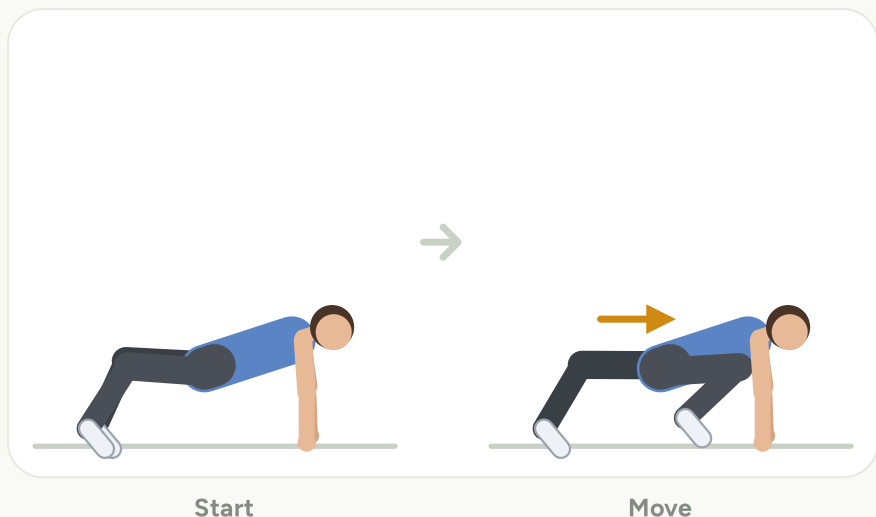

Start with
10 each side

Works your
obliques + abs

Core

3 points per rep

Mountain climbers

How to do it

- 1 Start in a high plank: hands under shoulders, body in a straight line.
- 2 Drive one knee towards your chest.
- 3 Switch legs in a running motion. Each knee drive is one rep.

Keep in mind: Keep your hips level with your shoulders and your hands planted. Slow is fine.

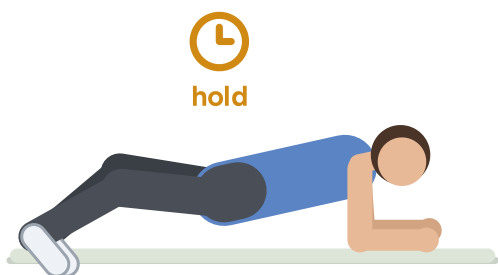

Start with
10 each side

Works your
core + shoulders +
cardio

Core

5 points per second

Plank

How to do it

- 1 Rest on your forearms with elbows directly under your shoulders.
- 2 Step your feet back so your body forms one straight line from head to heels.
- 3 Brace your stomach, squeeze your glutes and hold. Count the seconds.

Keep in mind: Stop when your hips start to sag or lift. A shorter plank with good form beats a longer sloppy one.

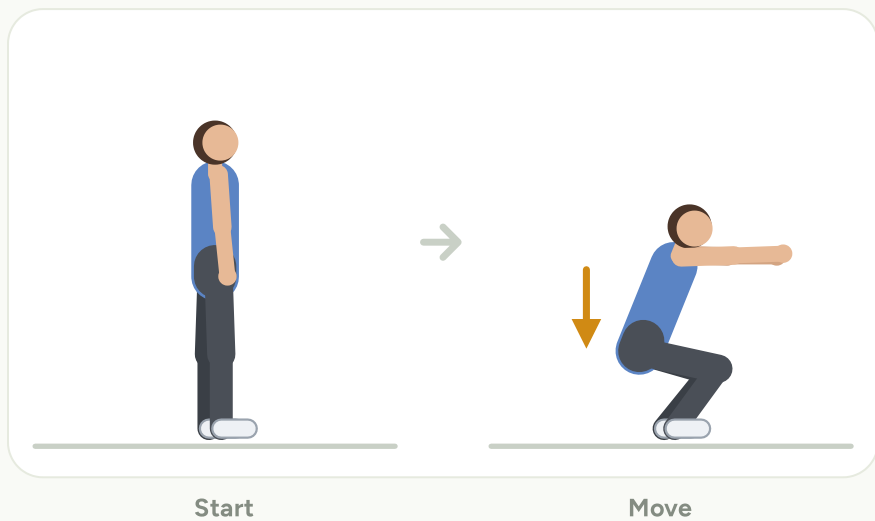

Start with
20–30 sec

Works your
whole core

Lower body

2 points per rep

Squats

How to do it

- 1 Stand with feet shoulder-width apart, toes turned out slightly.
- 2 Push your hips back and bend your knees as if sitting into a chair, arms reaching forward for balance.
- 3 Drive through your heels to stand back up.

Keep in mind: Keep your chest up and your knees tracking over your toes.

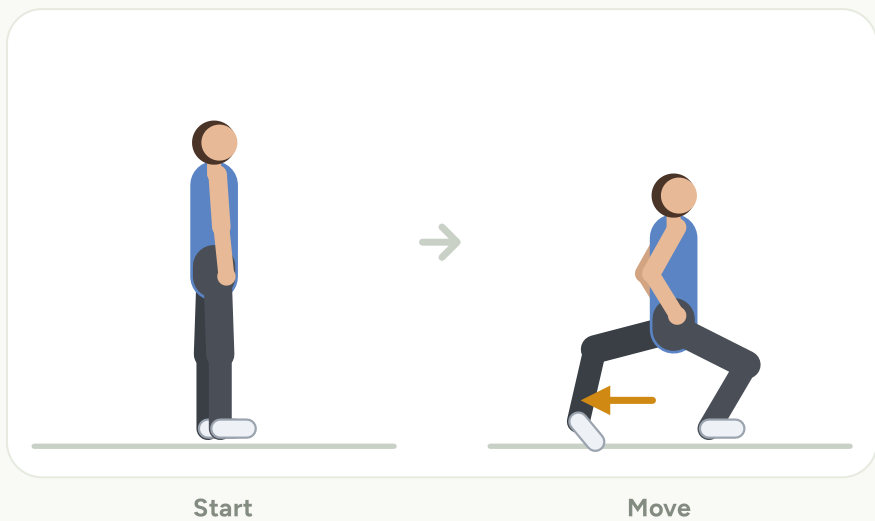

Start with
10–15 reps

Works your
thighs + glutes

Lower body

3 points per rep

Backward lunges

How to do it

- 1 Stand tall with hands on your hips.
- 2 Take a big step back and lower until both knees are bent to about 90 degrees.
- 3 Push through your front heel to return to standing. Swap legs.

Keep in mind: Keep your body upright and your front knee above your ankle.

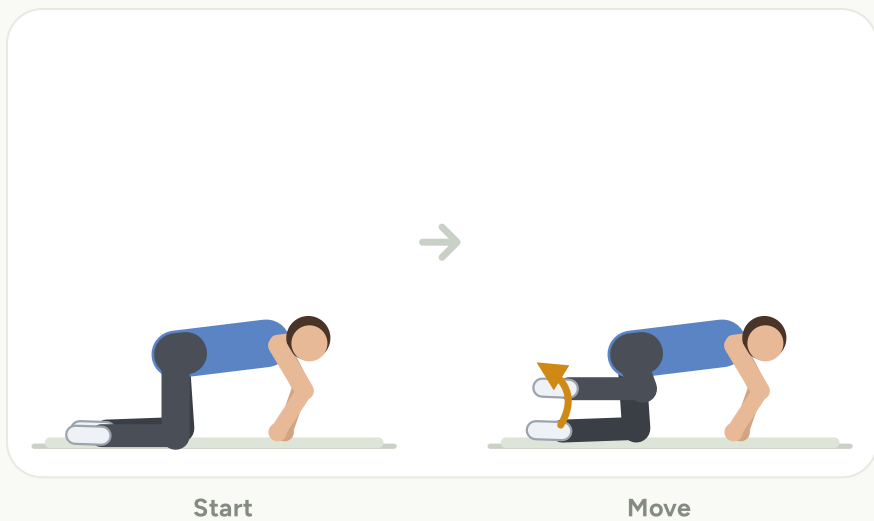

Start with
8 each side

Works your
thighs + glutes + balance

Lower body

2 points per rep

Hydrants

How to do it

- 1 Start on all fours: hands under shoulders, knees under hips.
- 2 Keeping your knee bent, lift one leg out to the side until your thigh is level with your hip.
- 3 Lower with control. Finish your reps, then swap sides.

Keep in mind: Keep your hips square to the floor and do not lean away from the lifting leg.

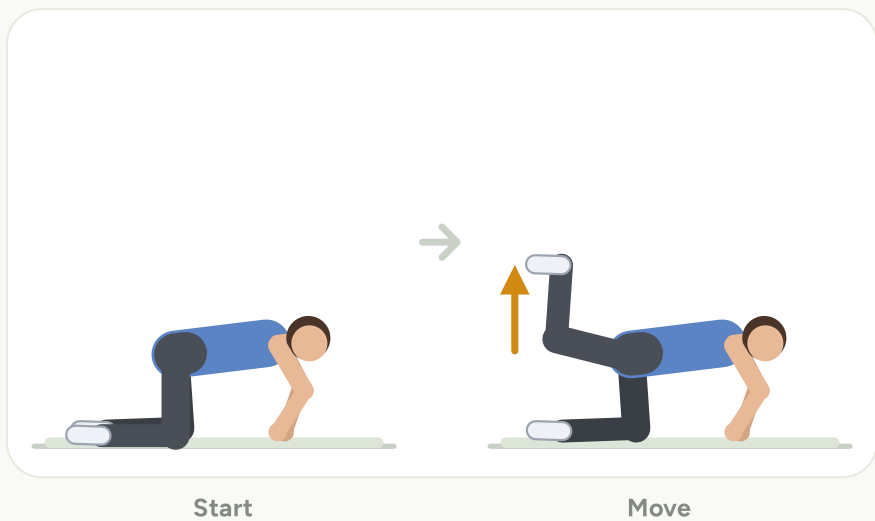

Start with
10 each side

Works your
outer hips + glutes

Lower body

1 point per rep

Donkey kicks

How to do it

- 1 Start on all fours: hands under shoulders, knees under hips.
- 2 Keeping your knee bent, lift one leg behind you until the sole of your foot faces the ceiling.
- 3 Lower with control. Finish your reps, then swap sides.

Keep in mind: Squeeze your glute at the top and keep your back flat, not arched.

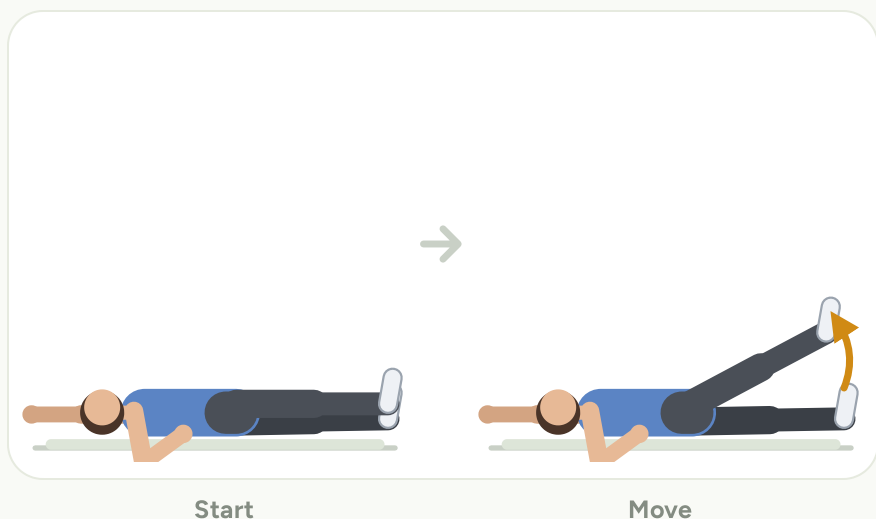

Start with
12 each side

Works your
glutes

Lower body

2 points per rep

Lying leg raises

How to do it

- 1 Lie on your side with your legs straight and stacked, head resting on your lower arm.
- 2 Lift your top leg as high as is comfortable, keeping it straight with toes pointing forward.
- 3 Lower slowly. Finish your reps, then roll over and swap sides.

Keep in mind: Keep your hips stacked. Do not roll backwards as the leg lifts.

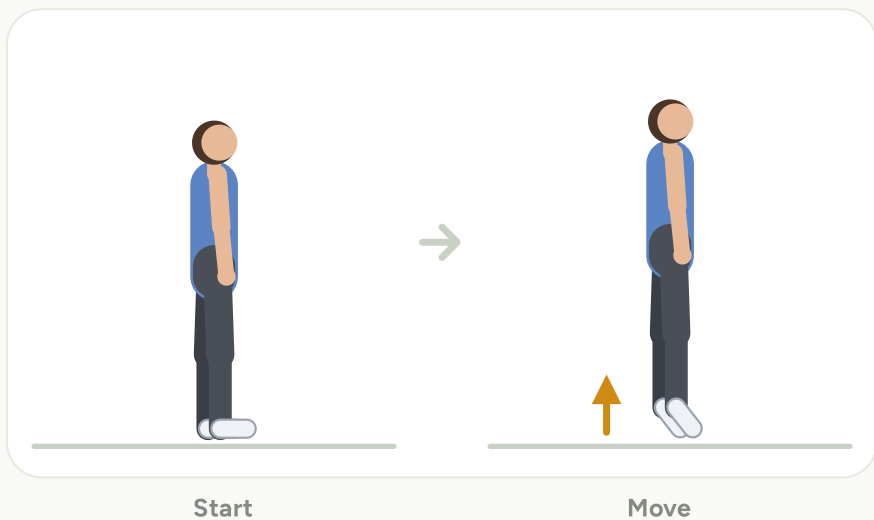

Start with
10 each side

Works your
outer hips + glutes

Lower body

1 point per rep

Calf raises

How to do it

- 1 Stand tall with feet hip-width apart. Hold a wall or chair for balance if you need it.
- 2 Rise up onto the balls of your feet as high as you can.
- 3 Pause, then lower your heels slowly.

Keep in mind: Go straight up and down without rocking forward. Slow lowering does most of the work.

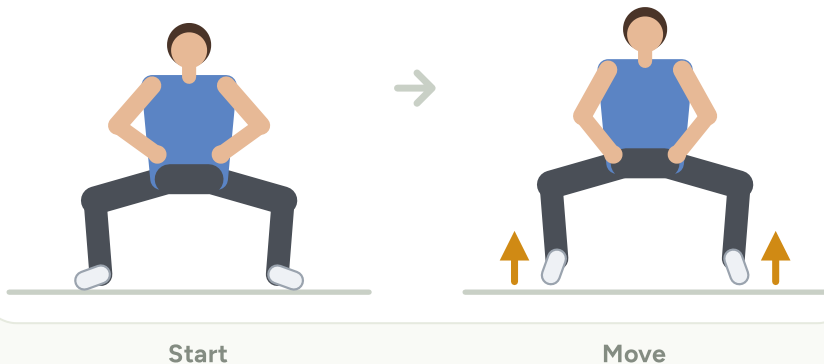

Start with
15–20 reps

Works your
calves

Lower body

2 points per rep

Sumo squat calf raises

Start

Move

How to do it

- 1 Stand with feet wide and toes turned out. Sink into a wide squat with hands on your hips.
- 2 Staying low in the squat, lift both heels off the floor.
- 3 Lower your heels and repeat without standing up.

Keep in mind: Keep your knees pushed out over your toes and your back upright.

Start with
10–12 reps

Works your
**calves + inner thighs +
glutes**

Standing core

1 point per rep

Standing knee-to-elbow crunch

How to do it

- 1 Stand tall with your hands lightly behind your head.
- 2 Raise one knee while bringing the opposite elbow towards it.
- 3 Tighten your stomach as they meet, then return and swap sides.

Keep in mind: Move slowly for control and keep breathing normally.

Start with
10 each side

Works your
abs + obliques

Standing core

1 point per rep

Standing side crunch

How to do it

- 1 Stand tall with your hands behind your head.
- 2 Lift one knee out to the side while lowering the same-side elbow towards it.
- 3 Return to standing and repeat on the other side.

Keep in mind: Bend sideways at the waist rather than leaning forward.

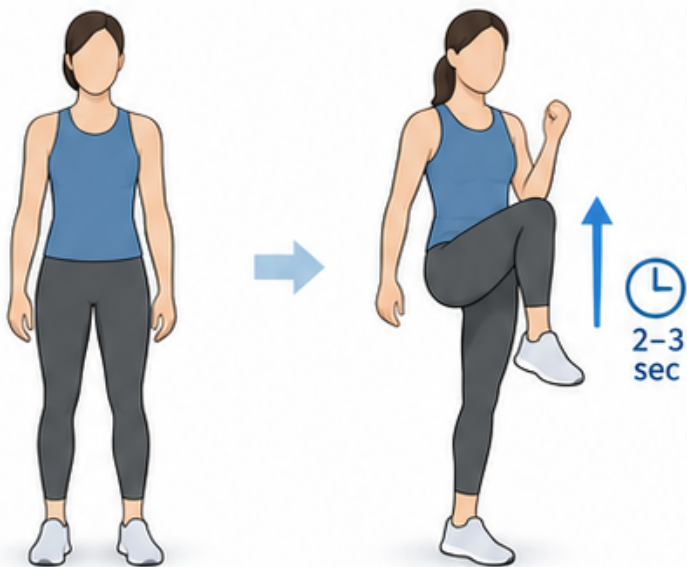

Start with
10 each side

Works your
obliques

Standing core

1 point per rep

Slow standing marches

How to do it

- 1 Stand tall and brace your abdomen.
- 2 Raise one knee to hip height and hold for 2–3 seconds.
- 3 Lower and change legs without leaning back.

Keep in mind: The hold is what makes it work. Stay tall through the standing leg.

Start with
10 each side

Works your
deep core + balance

Standing core

1 point per rep

Standing cross-body knee drive

How to do it

- 1 Reach both hands above one shoulder.
- 2 Bring them diagonally down towards the opposite rising knee.
- 3 Control the return, finish your reps, then swap sides.

Keep in mind: Rotate through your ribcage and keep the standing leg soft, not locked.

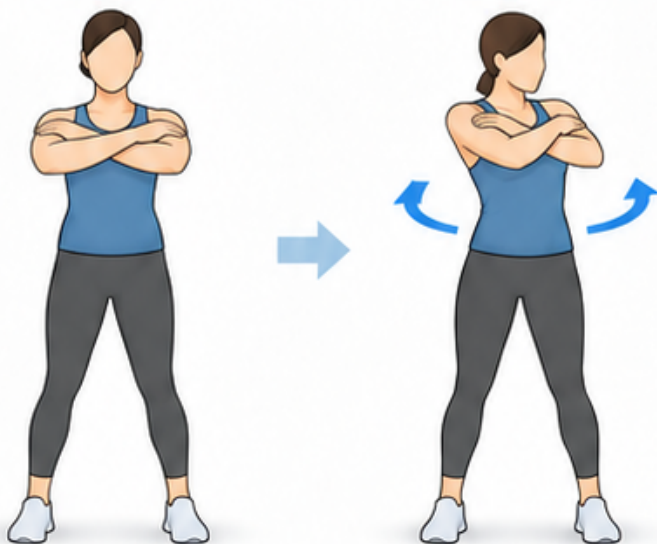

Start with
10 each side

Works your
**obliques + rotational
core**

Standing core

1 point per rep

Standing torso rotations

How to do it

- 1 Stand with feet shoulder-width apart and arms crossed over your chest.
- 2 Brace your stomach and slowly rotate your ribcage to the left.
- 3 Rotate to the right, keeping your hips mostly forward.

Keep in mind: Slow and controlled. Each turn to one side is a rep.

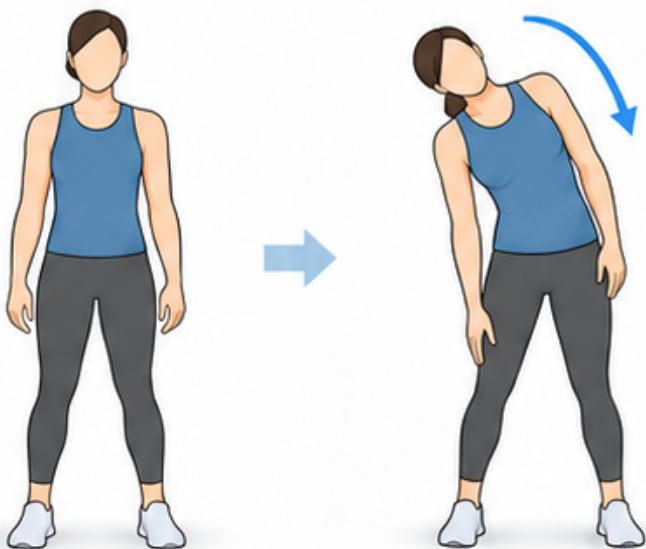

Start with
10–15 each side

Works your
rotational core

Standing core

1 point per rep

Standing lateral bends

How to do it

- 1 Stand tall with arms by your sides.
- 2 Slide one hand down the outside of your thigh.
- 3 Return to centre, then change sides.

Keep in mind: Move slowly and avoid bouncing. Bend directly sideways, not forwards.

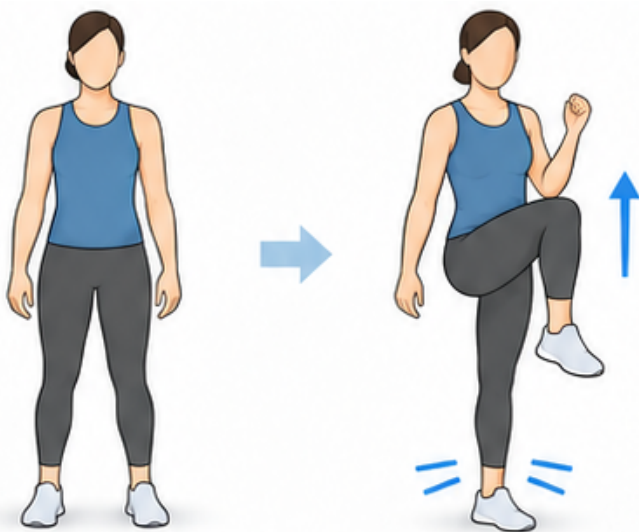

Start with
10 each side

Works your
obliques

Standing core

1 point per second

Single-leg balance + brace

How to do it

- 1 Stand on one leg with a soft knee.
- 2 Tighten your abdomen as though expecting a gentle punch.
- 3 Keep your pelvis level, stay tall and hold. Count the seconds, then swap legs.

Keep in mind: Fix your eyes on one spot to steady yourself.

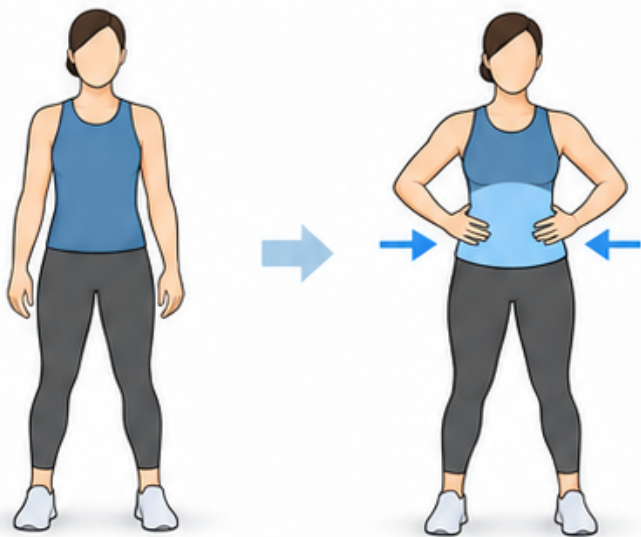

Start with
20–30 sec each leg

Works your
**deep core + hip
stabilisers**

Standing core

1 point per second

Standing abdominal brace

How to do it

- 1 Stand tall with hands on your hips.
- 2 Gently tense your entire midsection without sucking your stomach in.
- 3 Imagine tightening a corset around your waist. Hold and breathe normally.

Keep in mind: Count the seconds. You should be able to talk while holding it.

Start with
20–30 sec

Works your
transverse / deep core
